Open Filament Project

XYZ PRINTING

Step1 Software Installation : XYZprint R2 Beta 2.0.23

XYZprint R2 Beta 2.0.23 :

Donload link:

<https://drive.google.com/file/d/1gkGi8caiwpy1JHkeMBFeuvQse9-qSgwM/view?usp=sharing>

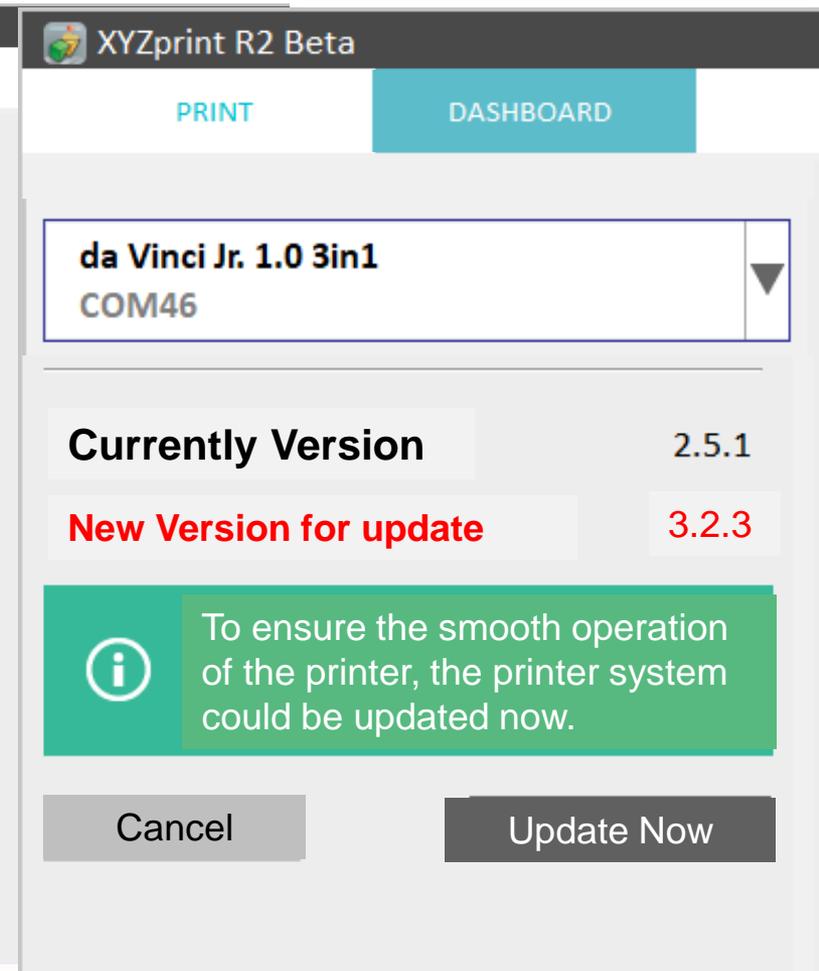

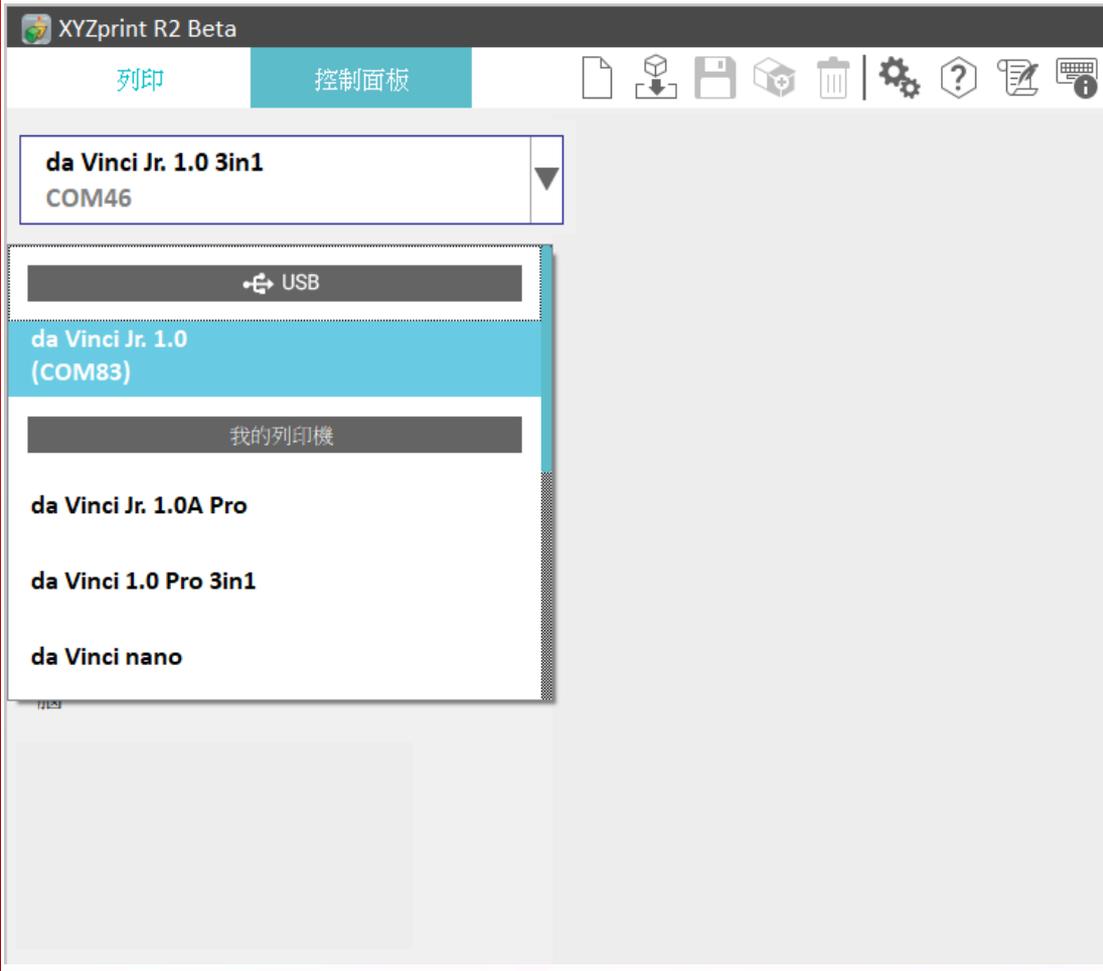

The screenshot displays the XYZprint R2 Beta software interface. The top navigation bar includes 'PRINT' and 'DASHBOARD' tabs. A printer selection dropdown shows 'da Vinci Jr. 1.0 3in1 (Offline)'. Below this, a status card for the printer shows 'Offline' and a message: 'Your printer is offline. What now?'. A troubleshooting section is visible at the bottom left. In the center, an 'About XYZprint R2' dialog box is open, displaying the XYZprint logo, the version 'XYZprint R2 Beta Version 2.0.23 (2A15778)', and copyright information. The background shows a 3D printing workspace with a grid and a printer icon.

Step2 Upgrade firmware

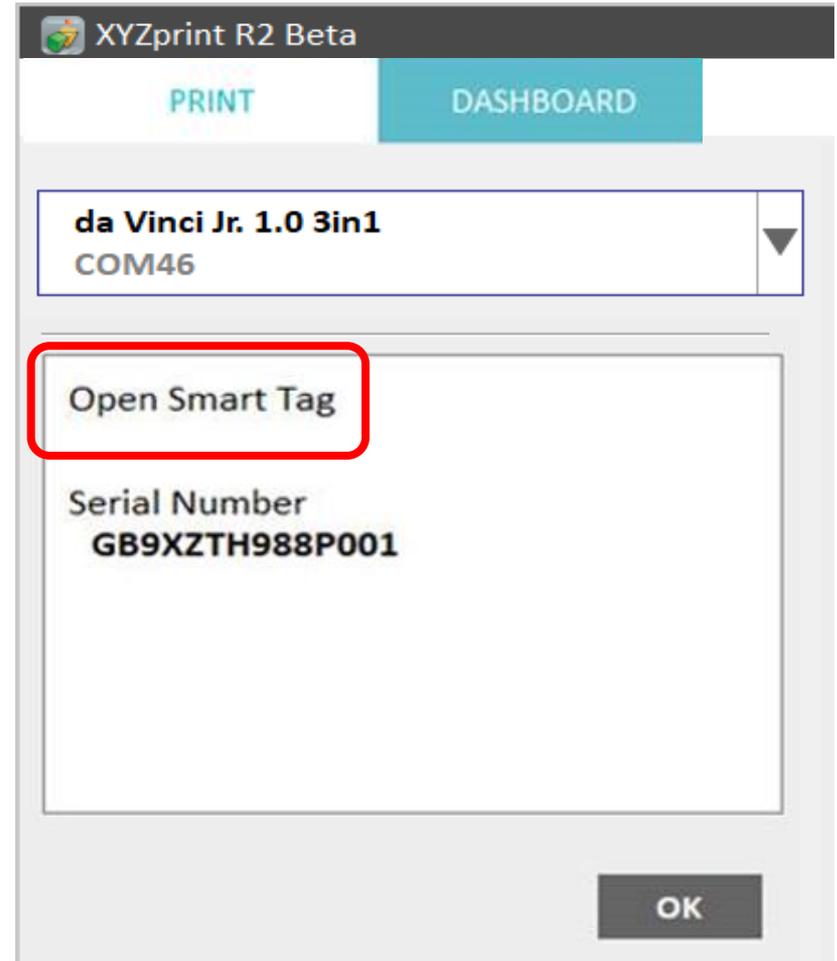

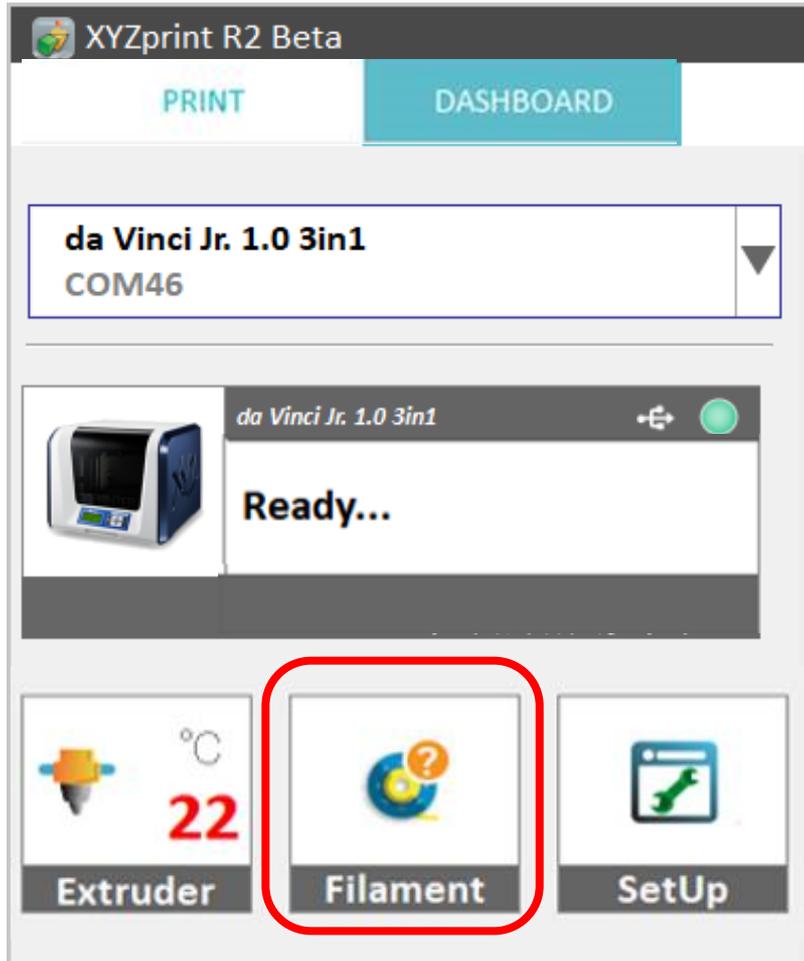

Launch the software and upgrade the firmware to 3.2.3 version.
After the update is completed, the printer will automatically reboot.
*Update time is about 3~10 minutes, please wait patiently.

* Notice
Check does the machine
automatically restart
when the FW upgrade
done.

Step3 Filament Chip Confirm

Click "Filament" and confirm that the status is "Open Smart Tag"

THANK YOU

The background is a solid red color with several large, dark red, curved, overlapping shapes that create a sense of depth and movement. The shapes are layered, with some appearing to be in front of others, creating a dynamic, abstract composition.
